# Tight Jacket Keeps Your Laptop Looking Cool

*by Maria O. Arguello*

**Product:** TightJacket  
**Company:** TightJacket.com  
**URL:** <http://tightjacket.com>  
**Prices:** \$15.00 and \$25.00  
**Overall Rating:** 4.5 out of 5 Apples

As soon as I got my new iPhone and my new MacBook Air I wanted to dress them up. I like to keep them cozy, protected from scratches and dirt, and looking cool. I went to [tightjacket.com](http://tightjacket.com) and looked over the many fabric patterns available to suit my personality. I chose the animal print for my iPhone and Midnight Flowers for my MacBook Air. They are beautiful.

I got a first-hand demo on how to apply my TightJacket for the best possible result from the owner extraordinaire Miss Terry Wilson. What I like most about the TightJacket is that it does not add bulk or weight to my iPhone nor my MacBook Air as other covers tend to do. They

are made of a spandex material and my earbuds and cleaning cloth for the iPhone fit nicely inside.

I can slip the iPhone in the TightJacket and retrieve my iPhone to answer a call quickly or use it like an iPod. It is an iPod first, after all. The TightJacket does not protect against water or shock. It also keeps my MacBook Air protected and looking very nicely dressed up.

When you visit [tightjacket.com](http://tightjacket.com), you will be impressed with the variety of gorgeous and stunning prints, all organized by color. You'll find TightJackets for a variety of manufacturers' laptops, not just for Apple, any of them available in an array selection of prints. There are also numerous covers for iPods, iPhone, cell phones, or notebooks. And if you don't see the dimensions for your item, you may specify the size and they'll custom size it for you.

Everyone I know who owns a TightJacket loves it. I highly recommend it.

Stylish, light protection for your laptop

Slip it on...
